Sales & profitability

Tableau dashboard highlights | Retail performance review

INTRODUCTION

What can retail data reveal beyond sales totals? I used Tableau to explore TechHub Retail sales, profitability and customer trends. This two-page showcase brings together original internship charts, practical recommendations and a separately labeled synthetic-data KPI demonstration.

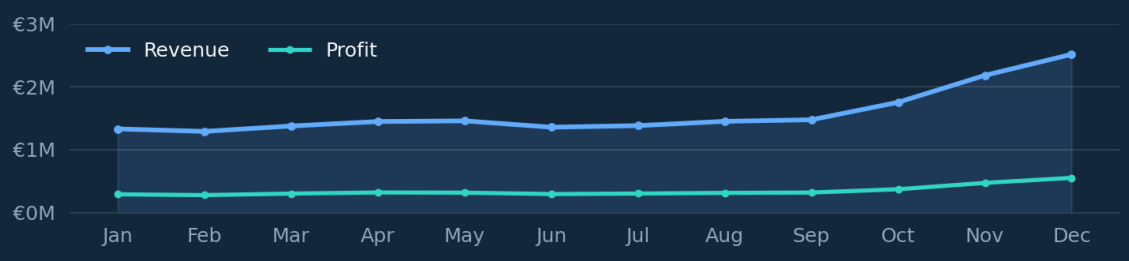

TECHHUB / RETAIL ANALYTICS

Sales performance / profit drivers / seasonal trends

2025 • EUR

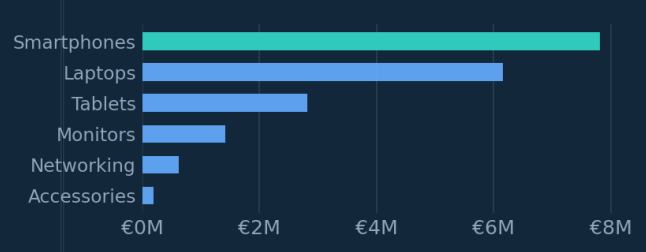

TOTAL REVENUE	GROSS PROFIT	PROFIT MARGIN	TOTAL ORDERS	ACTIVE CUSTOMERS
€19.03M	€4.14M	21.8%	19,500	1,300
2025 sales	After product costs	Profit ÷ revenue	Distinct order IDs	Distinct customers

Monthly revenue and profit

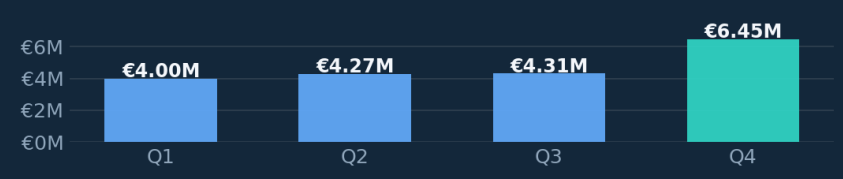

Highest sales occur in Q4

Revenue by category

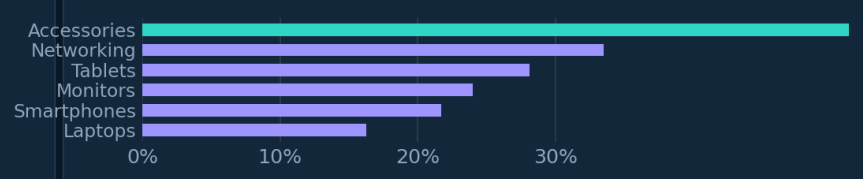

Compare sales volume and product mix

Quarterly revenue

Q4 leads annual revenue

Profit margin by category

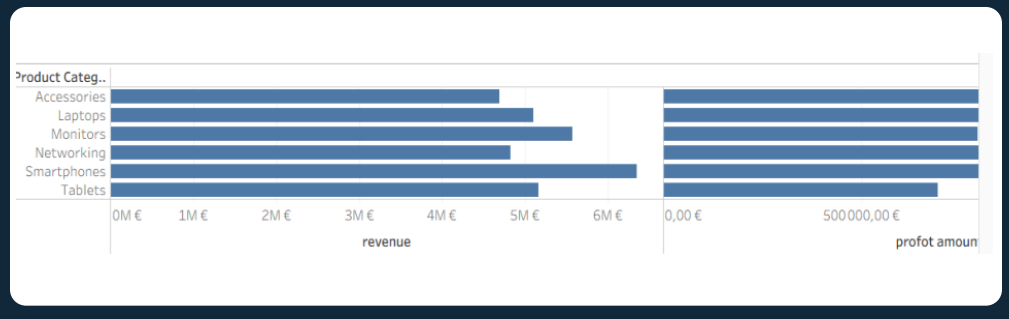

Revenue leaders do not always have the best margins

ILLUSTRATIVE SAMPLE • Synthetic data built from the report themes; not the original Tableau dataset

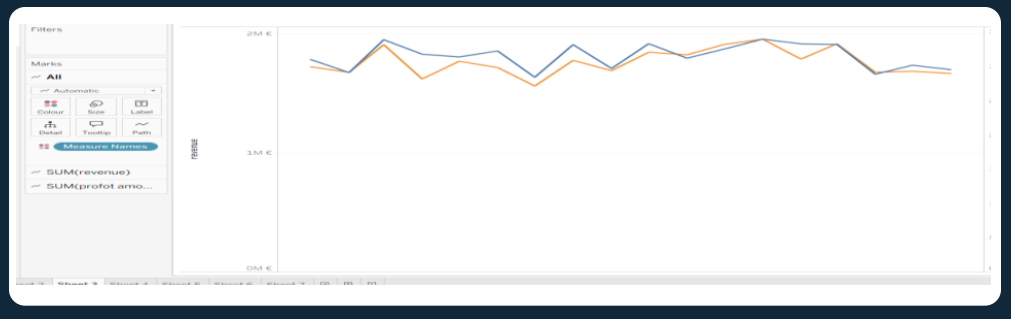

KPI dashboard: simulated 2025 dataset • Revenue €19.03M | Profit €4.14M | Margin 21.75% | Orders 19,500

01 Category profitability

Smartphones lead category revenue, yet revenue is not the same as margin efficiency. Prioritize profitable product mixes.

02 Seasonal trends

Revenue and profit generally move together. The report identifies strong Q4 performance and seasonal demand.

Business interpretation

Use profit margin alongside revenue when comparing categories and suppliers. Plan marketing and stock ahead of peak periods, and use targeted promotions in slower months.

Figures 01-02: original Tableau charts • KPI amounts above: simulated, not original company totals.

Customers & marketing

Customer value, product mix and acquisition insights

ANALYSIS FOCUS

This section explores product revenue concentration, customer profitability and marketing opportunities. Original Tableau charts show business patterns, while the illustrative customer dashboard demonstrates additional KPIs using synthetic data.

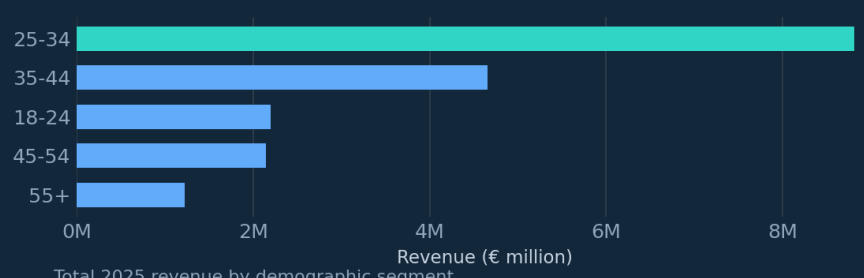

TECHHUB / RETAIL ANALYTICS

2025 • EUR

Customer performance / acquisition channels / observed customer value

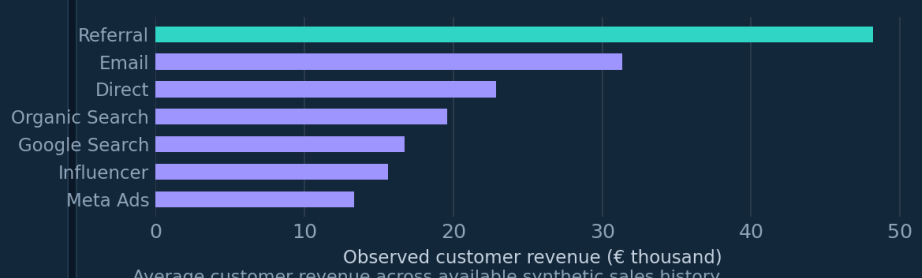

AVERAGE ORDER VALUE	REVENUE / CUSTOMER	PROFIT / CUSTOMER	TOP AGE SEGMENT	TOP VALUE CHANNEL
€976	€14,639	€3,184	25-34	Referral
Revenue per order	2025 observed spending	2025 observed profit	By total revenue	Observed value, 2024–25

Revenue by customer age group

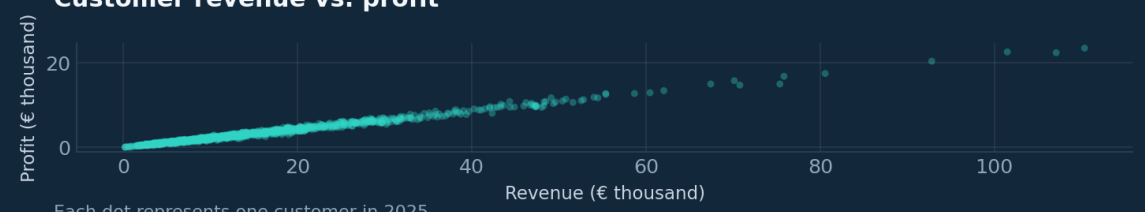

Total 2025 revenue by demographic segment

Observed customer value by channel

Average customer revenue across available synthetic sales history

Customer revenue vs. profit

Each dot represents one customer in 2025

Loyalty tier mix

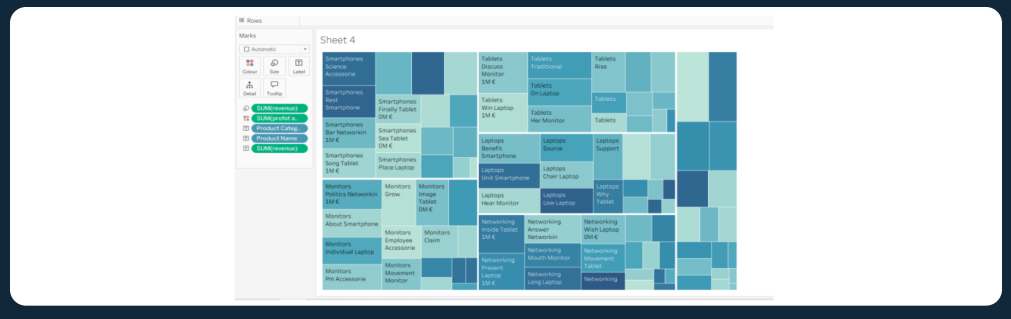

Active customers by loyalty tier

ILLUSTRATIVE SAMPLE • Synthetic data built from the report themes; not the original Tableau dataset

Customer KPI dashboard: simulated data • AOV €976 | 1,300 active customers | Revenue per customer €14,639

03 Product revenue mix

A relatively small set of products accounts for much of the revenue. Review inventory and category priorities.

04 Customer profitability

Revenue and profit are positively related, but margins vary. Review pricing, discounts and acquisition channels.

Customer value & next steps

Prioritize high-value acquisition channels, strengthen loyalty incentives and monitor product lifecycle performance. The €14,639 figure is observed annual revenue per customer, not a predictive CLV estimate.

Figures 03-04: original Tableau charts • Customer KPIs: simulated 2025 data, not original totals.
